

Jordi Rodríguez is a professional with long experience in CNC machining field. As an expert in CNC programming he has used several CAD/CAM systems and has now decided to switch to SprutCAM after having the opportunity to know it in depth as a user in the company SAP Solar.

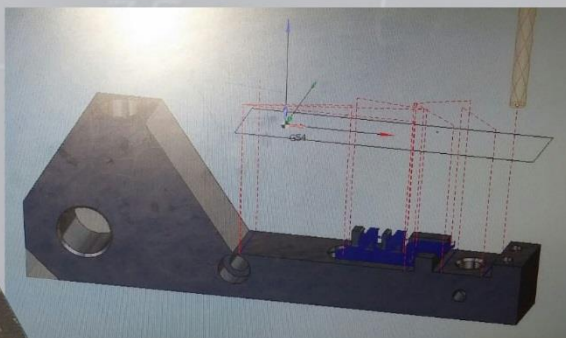

*«I was very surprised by the ease of use and versatility»*

"I was very surprised by the ease of use and versatility, especially considering the cost of the license, well below that of other CAD/CAM programs that are not capable of performing machining for complex parts or in such a short time", were the words of Jordi Rodríguez to know SprutCAM, who also commented: "It is certainly a product that everyone should know and that would help many workshops to improve their production and capacity without making investments that in many cases cannot afford".

*«It is certainly a product that everyone should know»*

In a short period of time Jordi Rodríguez has managed to make pieces of all kinds, from small and simple to more complex 3D shapes.
